

Greenhouse gas emissions CO₂

	2016	2017	2018	2019	2020
Total emissions (tonnes)	75'952	86'086	88'310	88'704	80'159
— of which Scope 1 (tonnes)	7'711	8'115	8'285	8'798	12'509
— of which Scope 2 (tonnes)	68'241	77'970	80'024	79'906	67'650
Total emissions per revenue (tonnes/million CHF)	100.8	103.4	99.1	96.9	96.1
Revenue (million CHF)	753.3	832.8	891.1	915.6	834.1

For the reporting of CO₂ emissions, 22 production plants of the core business (Healthcare Solutions and Industrial Solutions business areas) are included in 2020. The online distributor Reichelt, which is still held by Datwyler, and Distrelec and Nedis, which were sold at the end of February 2020, are not included in either revenue or resource consumption in any year. Datwyler thus covers more than 98% of CO₂ emissions at Group level. For newly acquired companies, resource consumption is included in the first full calendar year. Accordingly, the CO₂ emissions of the acquired company Ott (Germany) was included for the first time in 2017 and the CO₂ emissions of the acquired companies Parco (USA) and Bins (Brazil) for the first time in 2019. In addition to new additional plants and organic growth at existing plants, the inclusion of acquired companies explains the increase in absolute CO₂ emissions.
